

Entry Into Enclosed Space Training

This MNTB Entry into Enclosed Space training course is designed to equip maritime professionals with the essential knowledge and practical skills to enter and work in enclosed spaces safely.

This comprehensive course adheres to industry standards and best practices, focusing on hazard identification, risk assessment, and emergency procedures. By completing this training, delegates will gain the confidence and competence to ensure safety and compliance in challenging and high-risk environments on board vessels.

On successful course completion, learners will be equipped to:

Recognise potentially dangerous enclosed spaces on board a vessel

Complete a typical enclosed space entry Permit to Work

Carry out a safe testing of an atmosphere before entry using typical industry test equipment, including knowledge of its maintenance & testing/calibration requirements

Carry out a safe enclosed space entry

Carry out self-rescue from an enclosed space

Carry out the role of safety attendant

Location MSA Dover & MSA Gibraltar

Duration 1 day

Cost £200.00 incl. VAT
